Description	
<p>For "the latest" tab on the BKC homepage, the majority of the items are events.</p> <p>However, the events are currently organized by when they are authored. Comms is spending a ton of time reorganizing that tab by when events were authored (which we basically have to guess) to get the events to appear in the correct order.</p> <p>So we would like for the events and news to be organized by an "event" date, or to be able to have a drag and drop menu somewhere that we can reorganize "the latest" at our convenience.</p> <p>We spend soooo much time doing this.</p>
